All orders will be forwarded as soon as possible after receipt unless other instructions are given. Read carefully paragraph 2, page one. Also "Methods of Forwarding Plants" bottom of reverse side of this order sheet. Also see **Guarantee** on reverse side of this sheet. See also our offer to prepay charges under conditions named at bottom of this order sheet.

PREMIUMS.—Our terms being cash, enables us to offer additional plants as premiums in the proportions as given on page two of this catalogue. This premium does not apply on Special Offers, Bargain Offers, Collections, special prices of Bulbs or on Plants in quantity. We cannot allow premiums on orders from Nursery Department, nor can we allow premiums to be selected from Nursery Department.

If you wish us to substitute similar varieties in case those ordered (or size) should be exhausted, write "YES"

[illegible]

IF so instructed we will ship **\$3.00** **Orders** or larger by **Express Prepaid** provided we are given permission to remove the ball of earth

from the roots of the plants. This places the shipping of the plants on a mail order basis, and inasmuch as we pay postage to all points of the United States and its possessions, we would be willing to prepay Express charges on orders amounting to \$3.00 or more when shipped in this way.

This offer or special inducement is made to secure orders from far-away points where express charges are high and form a barrier to ordering. There are many far-away sections of our country where plants can be shipped and transplanted safely when the soil has been removed. This applies to such plants as McGregor's World-Renowned Roses, Begonias, Chrysanthemums, Carnations, Geraniums, Cannas and miscellaneous bedding plants; also some of the Hardy Perennials and mailing size plants of Hardy Shrubs, Vines, etc.

This offer should not be taken advantage of, however, on such plants as Cycas, Palms, Ferns, Ficus and other decorative plants, which must be shipped without the roots being disturbed if one expects best results from them;

Please read carefully paragraph on the reverse side of this sheet relative to the methods of shipping plants. Notice also our guarantee which we place on every order that we ship, no matter when it leaves our establishment.

REMARKS

We always use our best judgment in packing and forwarding of all orders, putting them up consistent with safe delivery and future results; and while there are instances where local planting or other conditions make it advisable to have orders sent by express so as to admit of the ball of earth remaining about the roots, still in a great many instances and to far away points, where transportation charges are high, the soil can be removed from plants of the larger sizes, and too large for mailing packages, and the roots packed in damp moss, and delivery of the plants made at a great saving in transportation charges. We will, therefore, unless otherwise instructed, use our best judgment in executing such orders, believing that at times, and where our customers are not aware of the best methods to use, their orders can be executed more satisfactorily. It should, therefore, be understood that if particular packing and forwarding instructions are to be followed, they should be plainly stated under the above heading "Remarks."

McGREGOR'S ANNUAL CATALOGUE

"Floral Gems"

FOR 1910

Offering Something for Every Garden,
Everything for Some Gardens, and covering

The Four Great Departments of Gardening Roses and Other Greenhouse Plants for the House,
Lawn and Garden; Shrubs, Trees, Hardy Perennials
and Climbing Plants; Seeds for the Flower Garden; Seeds for the Vegetable Garden, and Giving You
all the Advantages of

A GREENHOUSE, A NURSERY, AND A SEEDHOUSE AT YOUR DOOR

IN THIS CATALOGUE, our new book for spring of 1910, we believe we offer one of the most complete stocks of plants, seeds, fruits and bulbs that can be furnished direct from the grower to the planter. Years of experience in packing plants have resulted in methods which insure their safe arrival, and during our years of business career our products have found their way into every state and territory, and into many foreign countries. We promise you as fine a stock as can be grown, a large assortment and good service, and we believe, therefore, that this catalogue, which we hope will be found pleasing, comprehensive and helpful, is entitled to the careful consideration of all buyers and to those who are not yet on our books as customers. With assurances that all orders and communications shall have our most careful, conscientious and prompt attention, we solicit a careful examination of the following pages.

IMPORTANT INFORMATION FOR CORRESPONDENTS AND CUSTOMERS

This Book is our Salesman which offers at manufacturer's or grower's prices the products of one of the largest plant-producing establishments in the United States, making it a book which should be consulted by every plant buyer. Personal attention is promised to purchases with a guarantee of satisfaction in the execution of each and every order entrusted to us through this, our Silent Salesman.

Springfield, Ohio, U. S. A., is the acknowledged headquarters in the United States for the shipping of plants by mail and express, and is the greatest Rose producing center in the world. It is centrally located geographically, with five express companies—American, Adams, United States, Wells Fargo and Pacific, and has unequalled facilities for receiving and shipping orders and procuring the lowest rates to all parts of the country. This gives you the assurance of getting your order in the quickest possible time, and enables us to guarantee delivery at the minimum rate through one company, for where all these companies are not represented there must be an increase in express rates. Within twenty-four hours we can reach two-thirds of the population of the United States.

Plants Can Be Sent Safely at Any Time

We send orders nearly every day in the year—winter and spring and summer—and if we send your order you are protected against any loss in transit by our guarantee, given on this page and on back of order sheet. All orders filled as soon as possible after receipt. Please allow a reasonable time for the execution of your order. We generally ship the day of or the day after receipt, but during the busy season orders are sometimes delayed a few days. Should you write us concerning the order, give date mailed, amount of order and remittance, and if not shipped this will enable us to locate it promptly. **If you wish your order held,** do not fail to write it plainly across face of order sheet.

Guarantee of Quality and Service

We guarantee all Trees, Shrubs, Plants, Bulbs and Seeds that we send out to be true to name, and to reach purchaser in good condition when forwarded by mail or express (freight shipments at purchaser's risk), and hold ourselves in readiness to replace all stock that may accidentally prove untrue to label, free of charge, or refund the amount paid therefor; but it is mutually understood and agreed between the purchaser and ourselves that our guarantee of genuineness shall not in any case make us liable for a greater sum than that originally received for such stock that may prove untrue. Most failures with Plants, Bulbs and Seeds are due to soil conditions, unfavorable weather and other causes entirely beyond our control, rendering it impossible to guarantee success; and although we will take all possible care to send only

such stock as will under proper conditions give satisfactory results, we do not, and should not be expected to, guarantee stock to grow or guarantee results in any way, and we cannot entertain complaints that are not made promptly after receipt of goods.

When You Order Please use the printed envelope and order sheet herewith. Others will be sent you upon request. Always write your name the same, adding the postoffice, county and state on each and every communication you send us. If you have occasion to write us, please use a separate sheet.

Order Early It will greatly facilitate shipments if orders are sent in early. We aim to forward all orders the same or next day after receipt, but during the busy season it is nearly impossible, hence the advisability of ordering early.

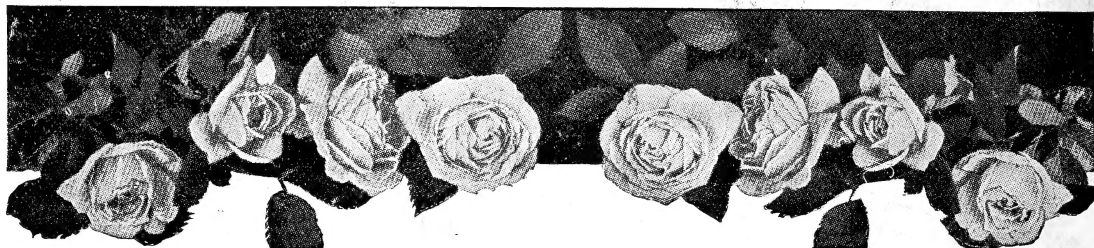

Orders Are Promptly Filled or our customers advised by postal card. If you do not hear from your order within a reasonable time, please mail us a duplicate for tracing, stating exact date of original order, amount of money mailed, form of remittance, exact copy of order, also our order number if we have mailed you an acceptance, with your name and full mail address.

If You Wish Orders Held Please say so, then we can book your order (and set items aside for you if necessary) until proper time to ship; otherwise we will send at once or acknowledge their receipt. We work extra forces when necessary, and always try to ship promptly.

Remittance With Order Please send money with your order sufficient to cover the entire bill, as it will facilitate the execution of your order. During the busy season to make out bills for customers, charge, and in a few days receive the money, make the proper credit and send receipt requires more work than we can readily perform, and if remittance in any case does not accompany the order it should have certified references with it. We must not be expected to send goods C. O. D. unless one-third of the amount is sent with the order to guarantee acceptance.

How to Remit Postoffice Orders—The safest and most convenient way of transmitting money from one point to another is by means of postoffice orders. If these are lost a duplicate can easily be obtained, and there is no danger of their being stolen, for no one can obtain money on them except the person to whom they are addressed. They can be obtained at most postoffices, but not all. The fee is but five cents for \$5.00 and under.

* While we assume the risk of paper money enclosed and carefully sealed in our self-addressed envelopes, silver money, except in registered letters, is at the risk of the sender.

Our Prices will compare favorably, we believe, with those of any responsible firm in the United States. We guarantee our goods to give satisfaction and every shipment is sent out under our guarantee of safe delivery at your door.

Postage Stamps These can be sent for fractional parts of one dollar or where postoffice orders cannot be had, provided a two-cent stamp extra is sent with every remittance. None but stamps in perfect order accepted.

Our Nursery Department is separate and distinct from our greenhouse, and it is necessary, therefore, that all items selected from this department, and from pages 78 to 81 inclusive, be shipped direct from our Nursery under separate transportation charges.

Remember that Nursery Stock is field-grown and if you wish trees or plants of a size for immediate effect, they must be sent by express or freight. In forwarding Nursery Stock we will use our best judgment as to shipping by express or freight.

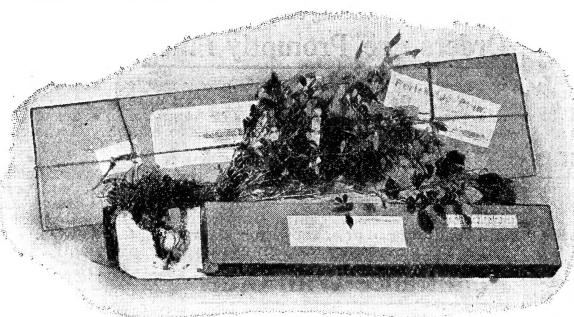

If So Instructed We Will Send **\$3.00 Orders** or larger by Express **Prepaid** Provided we are allowed

To remove the soil, or ball of earth, from the plants. Removing this soil and thus reducing or practically disposing of this extra weight, places the shipping on nearly a mailing basis, and as we pay postage we would be willing to prepay the express charges on orders put up in this way, when they amount to \$3.00 or more.

Read carefully the information given on the back of order sheet on the different methods of shipping plants.

This prepay offer does not apply on any shipments from our Nursery Department, nor should it be taken advantage of on orders containing large decorative plants such as Palms, Cycas, Rubber Plants, Azaleas, Rhododendrons, etc. from which, if the best results are to be expected, the ball of earth should not be removed.

Springfield Gives Lowest Express Rates. On 1 y where all the Express Companies are represented, as at Springfield, can the lowest Express rates be given.

Mailing and Light Express Boxes

Special Express Rates for Plants

By special arrangements with all Express Companies, all plants are carried at a reduction, and on account of a graduated scale of rates runs from twenty per cent. to thirty-three and one-third per cent. less than the regular merchandise rate. As this is the largest shipping point for plants in the United States, and as all offices are sending out plants every day in the year, the charges being regulated at the offices here, you are insured of the special reduction.

Plants by Mail All stock listed in our Catalogue, unless noted, is offered at prices marked, by mail, postpaid, and we deliver all such items free of all expense to any postoffice in the United States

Premiums Our terms being Cash with the order enables us to give additional plants on orders amounting to \$1.00 or more in the following proportions:

On \$1.00 worth of goods bought at single rates, select to the value of	\$.20 extra
2.00 These premiums cannot be allowed	.40 extra
3.00 on Special Offers, Collections or	.60 extra
4.00 goods bought at dozen rate or Seeds	.80 extra
5.00 in bulk or on Nursery Department	1.00 extra

The above additional premiums will be allowed on mail and express orders alike.

Lost or Unsigned Orders Letters are often sent us unsigned and letters are sometimes lost in the mails. If you do not hear from us within a reasonable time, please send us a duplicate of your order, stating when and in what form payment was sent and sign the name and address the same as in the first order, so that it may have immediate attention.

Correspondence We invite correspondence on any business topic, and are always glad to give you any information and suggestions on any subject within our knowledge. When writing about plants on an order, write on the order sheet, under the heading "Remarks," and when making an inquiry concerning plants not ordered, use a separate sheet, as our order and correspondence departments are conducted separately. When writing about an order, be sure and furnish complete information, so that it will not be necessary for us to look up records, as this always causes delays.

Our Fall Catalogue of imported bulbs, plants and seeds for fall planting and winter bloom will be ready about September 1, and sent to all of our patrons this year without request; to others free on application. If not received promptly, a postal card will bring it.

Errors and Complaints

We exercise the utmost care in filling orders, striving to do a little more than we offer, yet in the press of business errors sometimes occur, and when orders are received that are in some way damaged or not satisfactory, we wish to be promptly notified of the fact, and will make such an adjustment of your claim as will be satisfactory. When you write us, simply give the nature of your complaint, giving a list of the plants damaged and price paid for them, and state whether you wish these items replaced or the amount refunded. It is nearly impossible to find time in the busy season to adjust your complaints promptly unless you give us all the information required to do so in your first letter.

Foreign Orders

15 per cent. extra should be added to all Foreign Orders for Roses, Plants, Bulbs, Seeds, etc. that go outside of the U. S. A. or its possessions. This additional amount is needed to cover cost of extra postage and packing on long distance shipments. Payments are preferred by Money Orders. Many countries receive goods through Parcel Post from U. S. A. and most postoffices throughout Mexico receive packages by mail up to and including 11 pounds each in weight. This gives customers in Mexico a decided advantage in the receiving of plants by mail, where orders are for plants that will permit of their being sent in this way.

McGregor's World Renowned Roses

Pleasure of Rose Growing

It has been said that Roses could not flourish in this country as they have done in Europe. However true this may have been, it scarcely holds true today. With the many new Roses introduced into our country during the past two years, there is a large number of varieties which are well adapted to the different growing conditions in various sections, and the time is here when a very favorable comparison can be made between Roses growing in the North and Roses growing in the Southern States and California. Favorable comparisons can now also be made between the results here and those of the "World's Famous Rose Growing Section of Europe."

There is every reason, therefore, for the planting of a Rose garden to be a most fascinating and interesting work. The winter planning, selection of the most adaptable varieties, sending the order, receiving and planting, watching the growth and development of flowers of the different varieties is highly interesting.

We endeavor in this catalogue to present the merits of each variety fairly and faithfully, being cautious not to overpraise—preferring to say too little rather than too much. Recognizing the importance of robust, healthy habit, hardiness and freedom of bloom, combined with beauty of flower, we propagate largely varieties possessing these characteristics, and recommend such kinds for general planting; and we also give due attention to those varieties which are less vigorous and robust, and which therefore require more care to bring them to perfection. In the hands of the Rose lover all kinds amply repay any care bestowed upon them. Our immense stock and great variety of Roses enables us to offer assortments adapted to various purposes, and whenever we can be of any assistance in making selections our services will be cheerfully given.

Comparative Value of Roses

Don't think any Rose too small to do well; remember you were small once. There are many sections of our country where Roses do particularly well and where the one-year plants will make strong bushes in a summer, flowering continually throughout the season. The roots of the one-year plants being carefully protected in pots, permits of the shipping and successful planting of them anywhere. Roses of this size are to be recommended for all Rose-growing sections. If you wish the largest and best Roses for better effect and more bloom, then Roses of the two-year size from pots are to be recommended. These are, of course, much larger and heavier than the one-year size and must, of course, be considered better for planting in beds and borders and in filling out landscape effects. Roses of this size bloom early in the season and give excellent satisfaction in every way. They, of course, cost considerably more than the one-year plants, but are generally preferred and considered worth the difference in price.

Garden by McGregor's Guide

McGregor's Guide to Floriculture. Price 25 cents postpaid, or free on request with an order amounting to \$2.00.

In the cultivation of Roses and other plants, there are many points on which the average amateur plant grower wishes information, and to supply this want we have published a revised edition of McGregor's Guide to Floriculture, supplementing it with many planting tables and making it a book which will make a standard work of reference. The different subjects treated are:

Soil and Its Preparation, Treatment of Plants when received, Potting of Plants, Watering of Plants Indoors and Out, Plants in the House in Winter, Propagating, Temperature, How, When and Where to Plant, Window Boxes, Hotbeds, Cold-frames, Pits, Sowing Seed, etc., Fertilizers and Manures, Diseases of Plants, Insects, Protection During Winter.

Skill and Inexperience Succeed equally well with McGregor's World Renowned Roses.

Cincinnati, Ohio.

THE MCGREGOR BROS. CO., Springfield, Ohio.

GENTLEMEN—I am glad to write you that the Roses you sent me last Spring bloomed steadily all summer and up to the 25th of October. I was entirely unschooled in setting out and taking care of Roses, but they could not have done better, I believe, if cared for by a professional florist. Very truly yours,

HENRY T. HUNT, Prosecuting Attorney.

Roses on Their Own Roots (Not Grafted)

For the average amateur Rose planter, we cannot too strongly recommend the desirability of own-root plants. It is generally conceded now by all Rose growers that they are far preferable to budded Roses and much more satisfactory in every way. The Garden Roses of today are mostly the compounds of many types and species, and it is a fact that upon some varieties the foliage is so similar to that of the wild root growth that it is not readily detected by those who are not professional Rose growers. In consequence, everything gives way to suckers and sprouts of wild Roses. Own root pot-grown Roses never produce wild Roses—impossible to produce anything but the genuine variety. The most prominent Rose growers of today are growing Roses on their own roots, fully recognizing their superiority for the garden and the lawn. Very often it happens that the shoot of the variety budded onto the wild root will be broken off in packing or after planting or for some other reason dies down; the plant is then entirely worthless. With an "own root" Rose you may break it or cut it back clear down to the roots without harm, as in sprouting from the roots the genuine variety only will be produced. In cold sections tender sorts often winter-kill from the top down to the roots; a budded plant in such a case is thereafter worthless, but not so with an own-root one. Many of the budded plants are so ungainly, crooked and scraggly that shapely plants cannot be made out of them, and in consequence they are totally unfit for the lawn and garden. Nearly all budded Roses are grown on the wild Manetti Rose stock. It is natural for this stock to go dormant or partially so during the winter, and therefore when an ever-blooming variety is budded on this stock it is bound to impair the blooming quality of the plant for quite a portion of the year. A Rose grown on its own roots—very naturally the roots and top will work in unison. This is an important point. It follows, therefore, that only professional gardeners, who thoroughly understand the science of budding and the growing of budded Roses should ever undertake the planting of budded Roses.

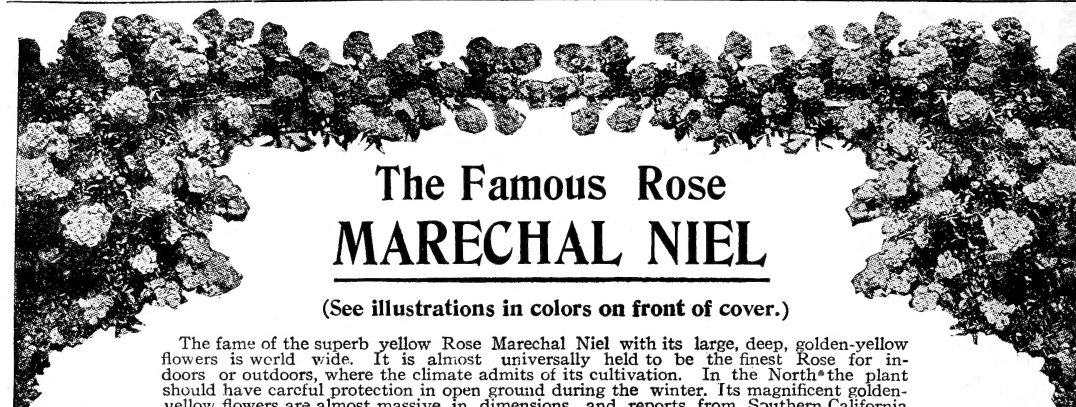

Advantage in Buying Pot-Grown Roses

There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. This cannot be said of home grown field Roses or imported or grafted Roses. Such plants must be planted before they start into growth and the planting time is exceedingly short, and with these the best results can only be obtained when handled by an experienced Rosarian. With pot-grown Roses it is different. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger size pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. This kind of a Rose, being in a growing condition, can be planted at any time through the growing season, and in this has many advantages.

In growing Roses success depends first on starting right, and then on most careful attention to the plants. In the first place purchase first-class plants on their own roots, as they are the most economical and most satisfactory in the long run; also try and select varieties suited to your locality, as the best Roses for Maine are not necessarily the best for California. Have your Roses on hand after all danger of frost has passed, and prepare the planting ground, which should be in a sunny location and apart from trees, overhanging buildings, shady locations, etc., by digging and working it as thoroughly as possible, same as for other plants. If possible, choose a cloudy day for planting, and do not allow roots to become dry. Make a hole large enough to admit the plant with the roots spread out in their natural position; then cover carefully, and press the soil firmly down and bring the roots in contact with the soil; then pour in water enough to wet the roots thoroughly, add more earth to fill the hole, and tread firmly down with the foot.

Remember there is much in common between animal and plant life, both demanding for their perfect development a sufficiency of nourishing food and drink, a temperature as equable as possible and thorough cleanliness. A careful observance of this law is bound to bring success.

The Famous Rose MARECHAL NIEL

(See illustrations in colors on front of cover.)

The fame of the superb yellow Rose Marechal Niel with its large, deep, golden-yellow flowers is world wide. It is almost universally held to be the finest Rose for indoors or outdoors, where the climate admits of its cultivation. In the North* the plant should have careful protection in open ground during the winter. Its magnificent golden-yellow flowers are almost massive in dimensions, and reports from Southern California growers tell of single plants showing one to two thousand blooms at a time. It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, an extremely free bloomer and flowers throughout the season. Contrary to many Roses, which lose their color after opening, Marechal Niel decidedly improves and takes a deeper yellow after being kept for a day or two. The Tea fragrance is strongly present in this Rose. It is a variety which practically stands by itself.

Price, strong one-year plants, own roots, 15c each, six for 85c, twelve for \$1.50, postpaid; nice two-year plants, 25c each, six for \$1.35, twelve for \$2.65; extra large pot-grown, on their own roots, at 50c, 75c and \$1.00 each.

THE QUEEN OF ALL FLOWERS The Garden Rose

The name is an inspiration to all garden lovers. Roses are justly classed among the showiest and best plants for decorating the home grounds. We endeavor in this catalogue to present the merits of each variety fairly and faithfully, being cautious not to overpraise—preferring to say too little rather than too much. Recognizing the importance of robust, healthy habit, hardiness and freedom of bloom, combined with beauty of flower, we propagate largely varieties possessing these characteristics, and recommend such kinds for general planting; and we also give due attention to those varieties which are less vigorous and robust, and which therefore require more care to bring them to perfection. In the hands of the Rose lover all kinds amply repay any care bestowed upon them. Our immense stock and great variety of Roses enable us to offer assortments adapted to various purposes; and whenever we can be of any assistance in making selections, our services will be cheerfully given.

We Offer a Grand Collection of
Teas and Hardy Teas (monthly bloomers). Hybrid Perpetuals (Hardy Garden or June Roses). Hardy Climbing Roses. Polyantha Roses. Wichuriana or Evergreen Roses. Moss and Rugosa Roses. Pre-eminent among which is

The National Rose of America The American Beauty

THE GREATEST OF THEM ALL

A hardy Rose of the largest size, having the ever-blooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, and equally valuable for winter or summer flowering. The flowers are so eagerly sought that they sell in the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. In color it is a deep, brilliant rosy-carmine, shaded towards the center with rich carmine-crimson. The back of the outer petals take the coloring of lighter dull carmine. The American Beauty is one of the most vigorous Roses we have. It makes the heaviest stems and the largest bush, it not being unusual to see a rampant bush with a dozen canes as thick as one's finger and several feet in height. The American Beauty is unquestionably the most popular Rose now before the public, a popularity due principally to its splendid value as a winter forcing variety. It should be protected outdoors in the winter. Sold under positive guarantee as to being true to name. (See illustration and prices.)

AMERICAN BEAUTY IS THE GREATEST ROSE IN THE WORLD

THE BLUE ROSE

Veilchenblau (Perfectly Hardy, Violet-Blue)

The Most Novel Creation of a Century

A WONDERFUL FLOWER

The introduction of such a distinct novelty cannot help but be a notable advent, and it has remained for Springfield, Ohio, the home of the Rose industry, where we grow Roses by the millions for the millions, and 85 per cent. of the product of the United States, to produce for the public, at a price within reach of all, the most novel creation in a flower that has been offered in years. It is nothing less than a blue flowering Rambler Rose. We know we make a startling statement when we advertise such a novelty at such an extremely low price, but when we have guaranteed genuine Veilchenblau Rose plants to send you, we have no hesitancy in including this novelty among our world renowned Roses.

THE BLUE ROSE for **25** cents

Strong two-year plants **75** cents each

Description

In Veilchenblau we have an improved and glorified free-flowering Rambler, a seedling from the famous Crimson Rambler. The flowers are violet-blue in color; a perpetual source of wonder; standing out in graceful form in large clusters, individual flowers measuring from $1\frac{1}{2}$ to 2 inches across. This new Rose is perfectly hardy, the growth vigorous, and with its beautiful foliage is well entitled to the honor of the title, "Queen of All Roses."

Read what Mr. McCain of Dayton, Ohio, says about the New Rose:

The new Rose Veilchenblau will undoubtedly create a sensation. The flowers I saw when at Springfield were decidedly pretty and a distinct novelty. I congratulate you on your introduction of this Rose. F. W. McCain, Dayton, Ohio.

A New Combination of Colors in Roses. The introduction of Veilchenblau makes it possible to produce effects which have never before been possible. Combined with its parent, the popular Crimson Rambler, which we offer in strong one-year plants at 15 cents each; its worthy companion, the White Rambler, strong one year plants at 15 cents, the Red, White and Blue Trio for 50 cents, postpaid (the Trio in two-year plants for \$1.25, postpaid), will enable you to produce an effect heretofore unattainable.

A BLUE ROSE

The October issue of the magazine Floral Life, has the following to say of The Blue Rose
The Latest Creation in the Floral Kingdom

Who was it that said there was nothing new under the sun? Whoever said it, did not speak truly. There is a Blue Rose, a new Blue Rose. Of course it is a new one, for we have never had any at all.

For years the Blue Rose has been the unattainable goal of the florist in his ever-receding dream. In fact, so improbable was it that there would ever be a blue Rose that one of the most learned Rose growers, a much-quoted authority, always claimed that there could not be any such thing; that the blue color was a physical impossibility in Rose life.

Hard upon the heels of the announcement of the location of the North Pole comes the unexpected news of the Blue Rose. Just why the North Pole has been for years the object of never-ending research in the scientific world only scientists can tell us, for so far as we know now it will do us no practical good and he majority of us, our children and grandchildren, will die happy, without ever having seen that wonderful spot in the inaccessible frozen North. But enough of the pole, its discovery; let us turn to the newly discovered fact in plant life, upon which every one of us will shortly have ample opportunity to feast our eyes.

The Blue Rose has ever been the undiscovered in plant life and today we have a Rose really blue, of a rich violet-blue, and best of all, it is no weakling fit only for the tender care bestowed by a scientific florist, but a strong, vigorous variety as vibrant with life as the Crimson Rambler; in fact, it is a seedling from this famous Japanese product. Imagine, if you can, a new Rose with all the hardy vigor of the Rambler in all respects, blooming in a color hitherto unknown in Roses.

Was it a chance discovery? Hardly. Nothing of value ever is a chance discovery. If we dig down deep enough into the facts we usually find what passes as the lucky chance is in fact the real result of long-hidden, patient labor, forgotten possibly in the joy of reaching success.

Scientific hybridization produced the Blue Rose through methods past the understanding of the average worker among growers.

Like all inventions of ingenious minds, we care not so much how they are produced as how they are made practical. Many of the most useful inventions if left with the original inventors would never have reached the practical stage at all, the visionary, scientific mind lacking that peculiar quality of practicability supplied by the equally valuable business mind.

While the scientists have given us a new Rose, the practical florists must give it to the public. Wherever the Blue Rose was born, its home will be Springfield, Ohio, for there clustered together are the already famous Rose growers, who, with their vast facilities for growing and distributing, give this point the acknowledged name of being the largest Rose-producing center in the world.

Where does California get the Roses which bloom there as nowhere else? Ask anyone from the homes fairly hidden with its flowers. Oh, yes, Springfield, Ohio. Where does the South get its Roses? Ask the Southern dealers, and their reply giving the staggering quantity of their purchases at Springfield would easily stamp the source of supply as the manufacturing center.

And so it is in the land of the Rose, be it California, Florida, Texas, or any other spot, they all depend on Springfield, Ohio, for the practical side of plant producing. So vast has the Rose industry grown that it is no longer a growing of plants as in the old days; it is a huge manufacturing of them, in huge establishments where hundreds of thousands of plants are grown side by side under the careful guidance of the expert rosarian.

And now we can have blue Roses at our doorsteps, blue Roses in the home, blue Roses in our children's hands, all for a mere song. And best of all, the Blue Rose will not be a rare novelty to be bought by men of wealth and housed with his rare Grapes or Orchids, but a Rose for the people, a Rose for us. A Rose for us who have the tastes and appreciation for a new flower and but a small income with which to gratify our wants. So here's to the Blue Rose and may all have its blooms!

THE MOST DESIRABLE ROSES OF LATE INTRODUCTION

The best bloomers for the yard and garden are included in these newer Roses of all kinds. Those offered are of unusual value, most of them having been selected while growing and blooming in Europe the past season. Just as Rose growers in America have come to recognize the essentials that must be present in a novelty, so in Europe these same characteristics are being bred into the seedling, and it is with confidence that we recommend the following magnificent varieties. The number of new varieties of Roses introduced from all parts of the world will average about one hundred per year. After a thorough test, usually from five to ten sorts each year will come up to the mark as being worthy of cultivation. The Roses listed here are not untried, having passed the most severe tests, and are offered as gold medal varieties; and though, as with all Roses, some are of growth and habit such as to make them specially adapted to certain sections of the country, generally speaking all will be found highly desirable.

The World's First Prize Rose, THE LYON ROSE

Here is a splendid new Hybrid Tea from France. (Mme. Melaine Soupert crossed with an offspring of Soleil d'Or). The form is full and globular, with large broad petals of good texture. The flowers are remarkably rich in color, being a shrimp-pink at ends of petals, center coral-red or salmon-pink, shaded with chrome-yellow. It is very fragrant and above all a perpetual bloomer. Wherever shown in Europe it has been enthusiastically praised and given the highest awards. At Lyons it received the "Prize of Honor," and at the National Rose Show, held at Paris last summer where 88 leading varieties were submitted, Lyon-Rose scored the maximum 100 points with the judges, and was the only one to receive the full number. **Price, strong one-year plants (60 cents each). Two year plants, \$1.00 each.**

White Killarney

An offspring of the famous pink Killarney. It is identical with it, except that the flowers are pure white. **Strong plants, 30 cents each; three for 75 cents, postpaid; strong two-year plants, 50 cents each; three for \$1.25.**

Mme. Second Weber

Rosy-salmon; one of the grandest novelties of recent years; the bud is long and pointed opening into an enormous bloom which deepens its color until fully expanded, when it is as impressive as an American Beauty; a fine strong grower, of the general type and color of "My Maryland." Awarded two gold medals. The texture of the Rose is very thick and heavy, and the form of the petals peculiarly beautiful; color, salmon-flesh on opening. **Price, strong one-year plants, 30 cents each; three for 75 cents, postpaid.**

Molly Sharman-Crawford (H. T.)

Strong, vigorous and branching in habit, flowering profusely and continuously, blooms large and perfect; grand for bedding purposes, and should have a thorough trial by all Rose growers. Color snow-white; a magnificent Rose. **Price, strong one-year plants, 30 cents each, three for 75 cents, postpaid; strong two-year plants, 50 cents each; three for \$2.00.**

Betty

A Grand Novelty

The greatest novelty of the past decade. It is the type of the Killarney Rose, and has a truly unique color—ruddy gold (coppery-rose, overspread with golden-yellow). Blooms extremely large, fairly full, of glorious form and deliciously perfumed; the petals measure four to five inches long. It is never out of bloom from early June until cut off by frost. Its growth is extremely vigorous, of very free-branching habit. **Price, 20 cents each, six for \$1.00; strong two-year plants, 35 cents each, three for \$1.00.**

Wm. Shean

Among the best Roses introduced during the past few seasons, Wm. Shean stands out by itself. The color is the purest pink with large-pointed flowers similar to Killarney. The buds are fuller, however, of heavier form and substance. The growth is vigorous. One of the leading Rose growers of Europe says of this Rose: "It is one of the largest flowering varieties yet distributed." **Price, strong one-year plants, 20 cents each, three for 50 cents, postpaid; strong two-year plants, 50 cents each.**

La Galissiere

A grand addition to the pink flowering class. The flowers are bright deep pink, similar to La France. The buds are extremely large and full and the variety is very free-flowering. It is a rank grower and strongly recommended as a first-class garden Rose, as it produces bloom of enormous size, very full and of magnificent form. **Price, strong one-year plants, 30 cents each, three for 75 cents, postpaid.**

The exquisite Rose
White Killarney

Laurent Carle

An extremely vigorous grower of erect branching habit and fine dark green foliage; long buds are borne on long stems, opening into large flowers of perfect form, just full enough to open freely; color brilliant velvety-carmine; a very promising variety. **Price, strong one-year plants, 25 cents; three for 60 cents, postpaid; strong two-year plants, 50 cents each; three for \$1.25.**

Queen Beatrice

A Hybrid Tea, a cross between Mme. Abel Chatenay and Liberty, with color an intermediate shade between those of its two parents. When first opening it is much darker than the Bridesmaid, and gradually fades to the beautiful silvery-pink of La France, when the Rose is at its best. The form of the flower resembles that of Liberty, large, full and double. It is a strong and healthy grower and very free-flowering. Delicately fragrant and a splendid keeper; it is ideal for cut flower purposes. **Price, 20c each, six for \$1.00; two-year-old plants, 50c each, six for \$2.50; \$4.50 per dozen.**

Grace Molyneux

A chaste Rose of rare beauty and fascination, the habit of growth is perfection, every shoot producing a bloom. A veritable pearl for garden decoration. The color is a creamy-apricot, flesh in the center, the outer petals when developed are delicate creamy-white inside, with a faint pink sheen on the reverse. Delightfully tea-scented. Altogether a most decided acquisition and one that will delight Rose enthusiasts throughout the world. **Price, good strong one-year plants, 40 cents each, postpaid, three for \$1.00.**

I do not order many plants, but I shall be pleased to recommend your firm to my friends as one where they will receive prompt and generous treatment. Very truly,

The Best Red Bedding Rose of a Century, Produces a Continuous Mass of Bloom

Baby Rambler

(Madame Norbert Levavasseur)

Dwarf, Hardy, Perpetual-Flowering Crimson Rambler

The descriptive name of this new Rose, "Dwarf Crimson Rambler," seems a misnomer, yet no name is more appropriate, for the fame of "Crimson Rambler" properly belongs to it. It forms compact bushes about two feet high, and covered with clusters of its rich crimson-red flowers throughout the season. It is practically never out of bloom for the whole season. **Perfectly hardy**, it requires no winter care. Should improve each year with good culture. Size of clusters and number of flowers in each are a marvel to all beholders. As a bedding variety, to make a low hedge, to border a walk for cemeteries, or growing in pots in the house, it stands alone. Remember it is **hardy, perpetual flowering**. **Price, 15c each, two for 25c; \$1.00 per doz. postpaid; two-year-old plants, 35c ea., three for 90c; \$2.50 per doz.**

Garden Roses

The Five Grand Cochet Roses

IF you want five of the finest hardy-bloom-
ing Roses for outdoor cultivation, varieties that will produce
hundreds of superb flowers throughout the growing season, order
the five COCHET ROSES. No matter where you live, they
will give you perfect satisfaction.

(1) Crimson Maman Cochet

Etoile de France

This rose has been named descriptively Crimson Maman Cochet, because of its vigor of growth, stiff stems, heavy foliage, freedom of bloom and its hardness fully entitle it to become a member of the Cochet family. It is as free flowering as any Tea or Polyantha Rose, bearing its massive, large, full, cup-formed flowers singly, on long, stiff stems; the color is new, clear, red crimson velvet, brightening in the center; the flowers are the most splendid substance, and exquisitely fragrant. **Price, strong one-year plants, 20 cents each; three for 50 cents; \$1.50 per dozen, postpaid. Two-year-old plants, 35 cents each; \$3.00 per dozen.**

(3) Pink Maman Cochet

(The Queen of all Pink Garden Roses)

Such beauty and exquisite form as is possessed by this variety is well nigh marvelous. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and one-half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Perfectly hardy in all sections of the country. The color is clear, rich pink, changing to silvery-rose. **Price, 15 cents each; four for 50 cents; \$1.00 per dozen, postpaid. Two-year plants, 30 cents each; four for \$1.00; \$2.50 per dozen.**

(4) Red Maman Cochet

Helen Gould

Grows in almost any soil or situation, and produces its superb flowers in amazing profusion, on long, strong shoots. For vigorous growth and freedom of bloom, better than American Beauty, and without a peer. The flowers are full and perfectly double, the buds beautifully made, long and pointed. Color warm rosy-crimson. Hardy everywhere. **Price, strong one-year plants, 15 cents each; four for 50 cents; \$1.25 per dozen, postpaid. Two-year-old plants, 35 cents each; \$3.00 per dozen.**

(5) White Maman Cochet

This most superb variety is identical with its parent Maman Cochet, except in color, which is snowy-white, sometimes faintly tinged with the slightest suggestion of pale blush. With the same freedom of bloom, magnificent form of buds and flowers, and hardness, it stands at the head of the list as the best White Rose for open-ground culture. It has the vigor of an oak, being hardy everywhere. **Price, 15 cents each; four for 50 cents; \$1.00 per dozen, postpaid. Two-year plants, 30 cents each; four for \$1.00; \$2.50 per dozen.**

(2) Yellow Maman Cochet

Our Grand New Rose

This variety is absolutely the best hardy ever-blooming yellow Rose in existence. In the open ground, it is superb—a typical Cochet Rose, with its gracefully molded buds, magnificent open flowers, stiff, strong stems, heavy foliage, and with the vigor of growth and blooming capacity that has made the Cochet Rose the best of their class and color. **Price, strong one-year plants, 20 cents each; three for 50 cents; \$1.50 per dozen, postpaid. Two-year-old plants, 35 cents each; six for \$1.75; \$3.00 per dozen.**

The
"Bargain Counter"
 Offering of Two-Year-Old
**CHOICE STANDARD EVER-
 BLOOMING TEA AND
 HYBRID TEA ROSES**

THE ROSES in this class are highly valued because of their fine colors and tea fragrance. They will bloom freely from June to November, even the one-year size plants (two-year-old plants will, of course, bloom more). If planted in the spring so that they may become thoroughly established during the summer, and then protected during the winter, they will, with few exceptions, prove hardy.

THE LARGE SIZE plants referred to above are the two-year plants. We also give prices on one-year plants, which, however, are not little, weak, forced slips, but the product of years of experience and our improved methods of culture, which insures the greatest vitality and abundance of bloom.

AGRIPPINA—A strong grower; bright scarlet.

BURBANK—Flower a clear pink, deep with large petals.

BON SILENE—Still a prime favorite; color, deep rose, shaded carmine.

CATHERINE MERMET—Faultless in form and charming in every shade of color, from the purest silvery-rose to the exquisite combining of yellow and rose.

THE
GRAND NEW
GERMAN ROSE

TAUSENDSCHÖN

Thousand Beauties

TAUSENDSCHÖN, which in German means Thousand Beauties, is a very appropriate name to give this great novelty. We are free to predict that Thousand Beauties will become the most sensational climbing Rose yet introduced, not barring the great Crimson Rambler. Imagine a Rose producing on the same bush so many different colored flowers that it is impossible to describe or even picture the variations. A single cluster of flowers is a whole bouquet in itself, hence the very fitting name, "Thousand Beauties." Blooming profusely from the beginning of June until the last of July, the flowers appear in large clusters, ten to fifteen in a cluster, are of splendid size and quite double. The colors run from delicate balsam or tender rose through the intermediate shades of bright rose and carmine, with white, yellow and various other delicate tints showing. There is no other Rose in cultivation like it. It is a strong grower, with but few thorns, magnificent foliage, a valuable feature in itself, impervious against mildew and absolutely hardy in the open ground anywhere. Wherever shown it has created a veritable sensation, and has been awarded numerous medals. For climbing over porches, bowers, pergolas or trellises, or for single specimens or pyramids, it will please you from the day you plant it. **Price, 20 cents each; three for 50 cents; \$1.75 per dozen, postpaid; large two-year-old plants, on own roots, 40 cents each; three for \$1.00; \$3.50 per dozen.**

The Premier Hardy Garden Rose General Jacqueminot

Famous the world over as one of the most magnificent Hardy Crimson Roses ever introduced. It is a strong, vigorous grower, entirely hardy, an early and abundant bloomer, and its buds and flowers are considered models of perfection, and its brilliant, shining crimson color is the standard of color by which other Roses are judged. In fact, it is almost unequalled in beauty of form and brilliant intensity of color. **Price, strong one-year-old plants, own roots, 15 cents each; six for 85 cents; twelve for \$1.50; two-year-old, heavy plants, 40 cents each; six for \$2.00; twelve for \$3.75.**

A Hardy Yellow Rose Soleil D'or, or Golden Sun

A cross between "Persian Yellow" and "Antoine Ducher." It retains a good deal of the character of the former in the wood and bark, but the foliage is vastly improved, being large and very plentiful. The habit of the plant is robust, producing vigorous shoots in abundance, branches straight and of good size. The coloring of the flower is very rich, a marvelously rich shade of chrome-yellow with a glint of coppery-rose in the center. The expanded flower is full, large and gobular, the center petals being well incurved, forming a perfectly double bloom. The coloring in the fully expanded flower is gloriously superb, blending reddish-gold, orange-yellow, nasturtium-red and opaline-pink. **Price, strong two-year plants, 60 cents each.**

HARRISON'S YELLOW Popular Hardy Yellow Rose

Bright, clear golden-yellow; entirely hardy, grows three to four feet high, and is fine for planting in group or clump or with other hardy shrubs; makes a grand display of bright golden-yellow flowers early in spring. **Price, heavy two-year-old plants, 50 cents each; three for \$1.25.**

HARDY HYBRID PERPETUAL ROSES

FOR GENERAL PLANTING

These are the tall-growing, superb June Roses, with a profusion of large, bright-colored and highly scented flowers during that month. If cut back judiciously when these flowers fade, successive stems of good flowers will follow at intervals all summer. They require rich soil, full sun and good cultivation in order to produce the grand flowers, with sturdy four to five foot stems that Rose-lovers exult over. Light pruning gives more and smaller flowers on shorter stems. All are very hardy and vigorous, requiring protection only in very cold climates.

CHRYSANTHEMUMS

CHRYSANTHEMUMS are of Japanese and Chinese origin, and are by far the most gorgeous and elegant of our fall blooming plants. Through the enterprise of American growers, who have given them time and devotion, they have, as if by magic, so developed as to give them the unquestioned title of "Queen of Autumn Flowers." For massive blooms, grandeur of color, ease of culture and certainty to flower, either in the open ground or in pots, there are no plants that will surpass them, and but few their equal. The season of bloom lasts up until severe frosts. It is a pleasing thought to anyone who may have poor success with flowers to know, whether other plants bloom or not, the Chrysanthemum will put forth some sort of a flower if the plant is only a few inches high. The endeavor of nearly all growers has been, in late years, to introduce varieties which will produce the largest and finest blooms for exhibition purposes, and it is of these varieties that our list is made up. Every sort we offer, if well grown, should prove a prize winner.

Chrysanthemum Novelties

Virginia Poehlmann

This sort has been fairly tested this year, and at the Chrysanthemum shows the large vases of it are attracting unusual attention. The color is a deep yellow, flower of compact, incurved form, with a strong stem holding the flower quite erect. The foliage grows well up to the flower. This variety was awarded the sweep-stake prize at the Chicago Chrysanthemum Show. Price, 20 cents each, three for 50 cents, \$1.75 per dozen, postpaid.

Lynnwood Hall

A glorious new Chrysanthemum, glistening snow-white, of the largest size, perfectly incurved, of elegant finish, and with stiff stems and beautiful foliage. Price, 20 cents each, six for \$1.00, \$1.75 per dozen, postpaid.

A. J. Balfour

Growing Chrysanthemums in the Yard and Garden

The Chrysanthemum is of easy culture, but to secure fine blooms and strong plants, with healthy foliage, certain rules must not be lost sight of, and care and attention while the plants are growing must be given. There is probably no plant cultivated for its flowers, which is capable of greater possibilities, and year after year the blooms are becoming finer, better in color, size, form and in every way, showing that the time and study which is being given to them is not in vain.

Growing Chrysanthemums for Large Flowers

To bed out Chrysanthemums with the purpose of having them bloom out of doors, procure good, strong young plants in the spring.

As soon as danger of frost is over, plant the Chrysanthemums out in a bed, in good, rich soil, in a well drained location. When the plants get to be eight or ten inches high, nip out the tops to make them branch. When branches start out well from the top, and are several inches long, nip the tops of them also, in order to induce more branches. This should not be continued later than the 1st of August, as, in about a month from that time, they will begin to make buds. When the buds appear, if large flowers are wanted, allow only one, the center bud, to remain on each branch, but if quantity is wanted and not quality they may all remain, but the flowers will be much smaller. As soon as it is time for frost, the plants should be protected at night to keep them from being touched. The subject is fully treated in McGregor's Guide to Floriculture

DECORATIVE FERNS

These beautiful plants for home decoration vie with the Rubber plants for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Fronds have a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Ferns of the Pteris family, which are best for the house, do as well as the Sword Ferns. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years. We recommend all the varieties listed for indoor growing or for ferneries for table decoration. Ferns should be planted in a good light soil with some sand and leaf mold added, give good drainage.

Fern
Nephrolepis
Whitmanii

Nephrolepis Exaltata Bostoniensis (The Boston Fern)

This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. **Price, nice young plants, 10 cents each; larger plants, 25 and 50 cents each.**

Nephrolepis Scottii

It is a condensed form of the Boston Fern, with characteristics not evident in the parent, an average plant in an eight-inch pot having 200 fronds. The fronds average about twenty inches in length and three inches in width at the widest point, being more finished than the parent. **Price, nice young plants, 15 cents each; larger size, 25 and 50 cents.**

The Plumed Scottii Fern

(Nephrolepis Scholzei)

The ideal plumed Fern, holding the same position to all other plumed varieties that Scottii holds to the old Boston. It is a sport from Scottii possessing all the merits of that most popular variety, but with the pinnae sub-divided, giving it an airy feathery appearance. **Price, nicely shaped plants; 50c ea. p'pd.**

The Springfield Fern

Offered for the first time. A valuable Fern, especially for vases, baskets, and box work of very erect growth, the fronds more stiff than the Boston, and similar to the Piersonii Fern. It is a vigorous growing variety and we believe will prove very popular. **Price, nice young plants, 15 cents each; strong plants, 35 and 50c.**

Nephrolepis Piersoni (Ostrich Plume)

An entirely new form of Boston Fern. The pinnae subdividing making miniature fronds which are superimposed on the main fronds, looking as if two, or even three, were condensed in one. They are graceful, feathery, plummy, nothing describes them better than "Ostrich Plumes." **Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents.**

Nephrolepis Whitmanii

The best of the Crested Ferns and a great favorite. (See cut.) Delights in hot weather and is perfectly at home here in the summer. Whitmanii is of dwarfier growth, but equalizes matters by compactness and a wider, stockier shape.

Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each, postpaid. Specimen plants, 75 cents.

Nephrolepis Piersoni Elegantissima or Tarrytown

This is a sport from the Pierson Fern; the plant is of much more compact habit, one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes. **Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each, postpaid. Specimen plants, 75 cents.**

Ostrich Plume Fern

Nephrolepis Superbissima

The latest improvement in this family of Ferns, unique in foliage, quite different from all other varieties of this family, standing in a class by itself. It makes a dwarf, compact growth similar to the Scottii Fern, the fronds however being more dense, firm and rigid, and the foliage several shades darker than any other Fern coming from the Boston type.

Price, nice young plants, 35 cents each; strong plants in 4-inch pots, well established, 75 cents each.

HARDY GARDEN LILIES

The beauty of the Lilies appeals to everyone. A really beautiful garden without them is unimaginable; they are needed in quantity and variety to complete it, against evergreens, in groups or lines in the shrubbery, or borders, wherever serene, stately, faultless beauty of outline is required. We here list only those that every good garden really needs. Their culture is simple. Give them good, well drained soil, with no fresh manure in it, a cushion of sharp sand about their roots and a mulch in winter, with no disturbance of the roots for at least several years. Plant at least 8 inches deep, unless the bulbs are very small, for Lilies as a rule are not set deep enough, and therefore fail in a few seasons. (Protect all Lilies in winter.)

*Lilium Auratum

MCGREGOR'S MAMMOTH FLOWERING BUTTERFLY PANSIES—There is no flower more beloved, admired and even adored, than the Pansy; no flower border, be it ever so gay and gorgeous, is so interesting. The combination of colors in the same flowers is exquisite and wonderful, and yet so delicate that no description can convey an adequate idea of their beauty, embracing so many varieties—striped, spotted, bordered and fringed; in rainbow colors, with rich, velvety textures; some light yellow with deep violet spots, the upper petals carmine, edged with white; yellow with crimson-maroon spots and blue rims; deep blue with yellow center, edged black; violet with white center and carmine edges; brown and golden-bronze; jet black; ultramarine blue; pure white, intense yellow. Its culture is not at all difficult and may successfully be attempted by anyone inexperienced in horticultural affairs. Pansy plants planted in the spring as soon as the frost is out of the ground will begin to bloom at once, and afford daily pleasure for a month before Coleus or Geraniums could be even planted. If snow should fall after planting they would not be hurt. In fact, to get the best results from Pansies, they should be planted just as early as they can be. To get best results and extra large flowers, the soil must be extremely rich—we use equal parts well-rotted manure and soil. Price, 40 cents per dozen, \$2.50 per hundred, postpaid; \$2.25 per hundred by express.

Whether planted individually or collectively, the shrub is an important feature in the adornment of any grounds. In groups they can be made to emphasize some feature of the lawn, to screen some unsightly object or to destroy the strong stiff lines of foundation walls. At the edges of the lawn, along walks and drives, or in distant corners, a collection of shrubs may be gathered together that will give a succession of bloom from the opening of spring until frost comes to destroy the flowers. Shrubs with purple and yellow leaves should be added, to give character and contrast to the planting.

When the leaves have gone, the brilliant fruits of other species and bright, conspicuous bark of certain shrubs add variety and interest to the monotony of winter.

Nursery Department Choice Fruits and Fruit Trees

Prices on NURSERY STOCK are placed very low and we cannot allow premiums to be selected on orders for small Fruits or Fruit Trees.

The trees offered are young and thrifty and will make a very rapid growth and bear quickly. When fruit trees or shrubs are received, before they can be planted they may be safely kept a reasonable length of time by having the roots packed in boxes of moist soil and stored in a cool cellar or shed. It is important to order fruit early, that they may be planted out before the foliage starts.

When offered by mail, postage is paid by us; if by express or freight, charges are to be paid by purchaser; but larger stock will be sent.

SPECIAL NOTICE—As our Nursery is a separate and distinct department from our Greenhouses, it is necessary that all nursery stock orders be shipped direct from the Nursery.

TREES BY MAIL—We offer a choice lot of small one-year-old trees suitable for mailing to our customers in distant States, thus saving them heavy express charges. We know many will avail themselves of this opportunity of getting trees who could not otherwise do so.

The Finest Varieties of Strawberries

All varieties offered in this list have perfect or bi-sexual blossoms, except those marked (P), which are destitute of stamens and are termed pistillate or imperfect flowering varieties and must be planted near some perfect-flowering sort or they will produce little or no fruit. We advise fall planting for best results.

Dip the plants in water as soon as received, and bury the roots in moist, shady ground till you are ready to set them out. Neglect for an hour or so is often fatal.

McGREGOR'S SELECTED FLOWER SEEDS

We have used the greatest care in obtaining our Flower Seed, and those we offer you are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seed planting may be attributed to the manner in which the seed is sown rather than the lack of germinating power in seed, and seedmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes, in good garden soil. Cover seeds very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be taken in watering the seedlings well after planting and to protect from the sun for a few days with light paper.

Flowers from seed are usually known as annuals, biennials and perennials.

Annuals bloom and ripen seed the first year, and then perish.

Biennials do not generally flower the first year, and are in perfection only one year.

Perennials continue to flower several years in succession. Many of them bloom the first year if sown early.

Self-Watering Plant Boxes Self-Watering Flower Boxes

These boxes are made of heavy galvanized iron and have a water reservoir in the bottom which is filled through a tube extending to the top of the soil. The water is conveyed to the roots of the plants through sponges inserted in holes through the false bottoms, giving your plants always exactly enough and never too much water. One of the greatest secrets of success with flowers is correct watering.

These boxes need to be supplied with water only about once every two weeks, thereby enabling you to leave your plants safely without attention while away from home.

Beautifully enamel finished and very attractive.

INSECTICIDES AND FUNGICIDES

Insects are divided into two classes. First, the chewing, gnawing and biting insects; and second, sucking insects. Those of the first class eat the foliage or fruits, or gnaw off the stems and flowers of the plant. Whether they are bugs, worms, caterpillars or slugs, they are best destroyed by some poison applied on the surface of their food plants, as Paris Green or Hellebore. If for any reason it is not deemed safe to use these poisons, Pyrethrum (Persian Insect Powder) or Tobacco Dust should be used.

For those insects classed under the sucking insects, such as Scale, green and red Spider and Mealy bugs, must be killed by insecticides, which are either irritants and which produce death by coming in bodily contact with the pest, or substances that close up the breathing pores and produce suffocation.
